

Run The Application

Team ID	PNT2022TMID40074
Project Name	AI based discourse for Banking Industry

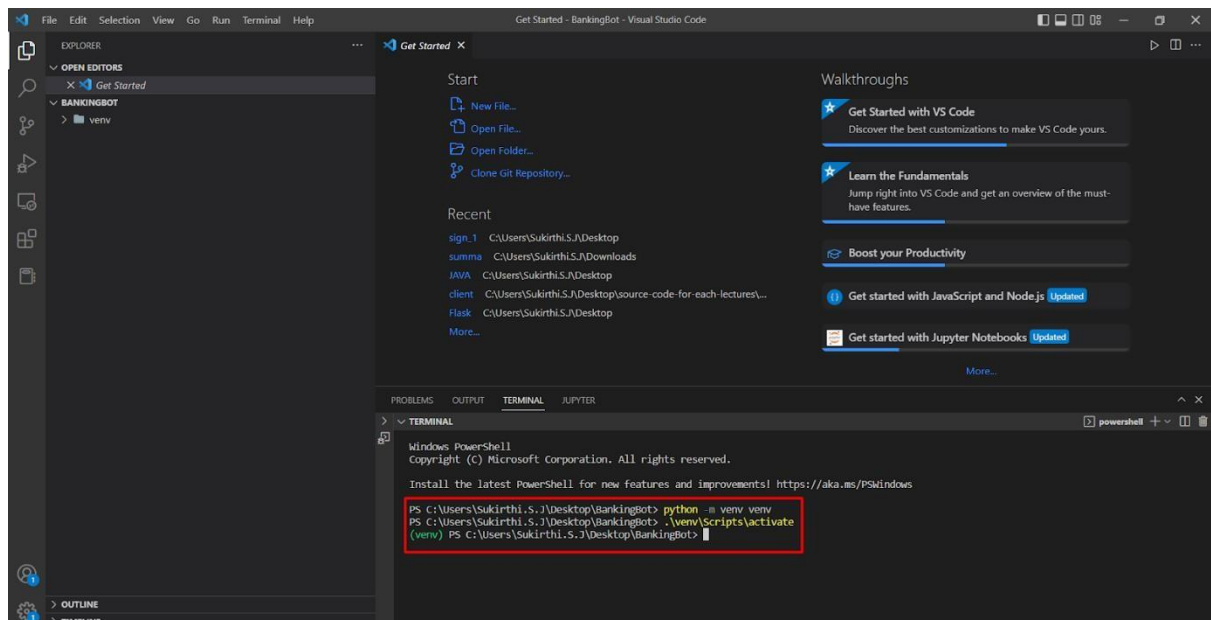

Integrating Watson Assistant to a webpage:

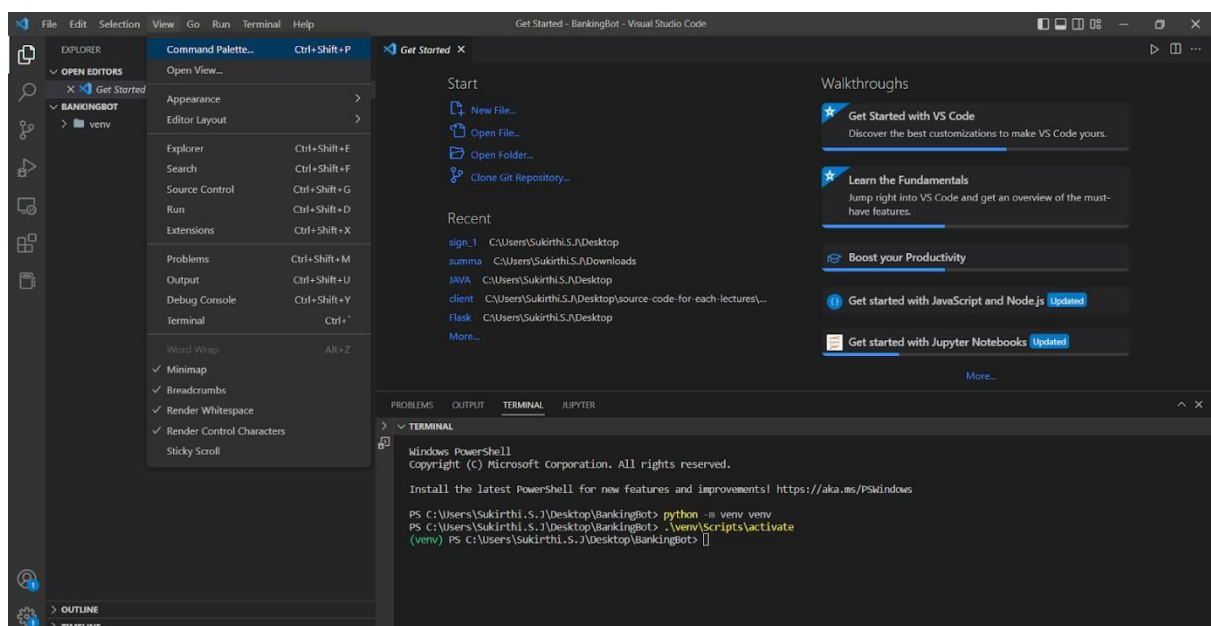

Now in order to run the flask application we want to set up a virtual environment for that follow the steps below.

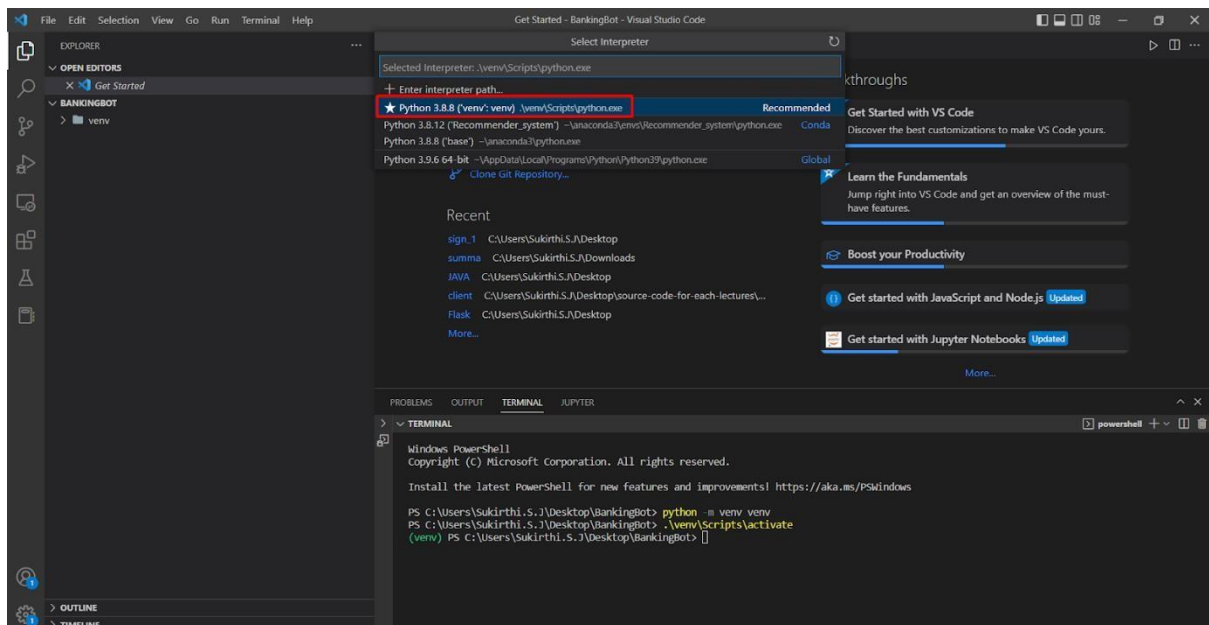

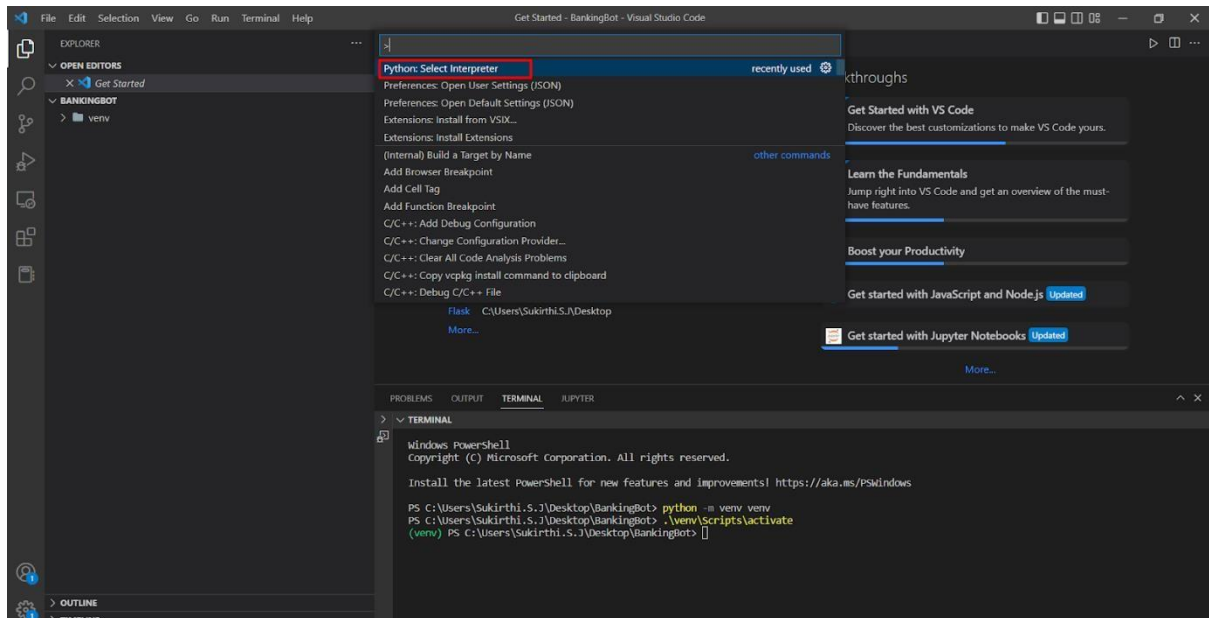

In order to activate the virtual environment we use the below command

Next go to view and select command palette

Search for python interpreter and select it

Now to install flask in this virtual environment follow the below commands

```
PROBLEMS  OUTPUT  TERMINAL  JUPYTER
>  ▾ TERMINAL
[icon]
(venv) PS C:\Users\Sukirthi.S.J\Desktop\BankingBot> python -m pip install --upgrade pip
Collecting pip
  Using cached pip-22.3.1-py3-none-any.whl (2.1 MB)
Installing collected packages: pip
  Attempting uninstall: pip
    Found existing installation: pip 20.2.3
    Uninstalling pip-20.2.3:
      Successfully uninstalled pip-20.2.3
Successfully installed pip-22.3.1
(venv) PS C:\Users\Sukirthi.S.J\Desktop\BankingBot> 
```

Collecting colorama
```

Now the environment setup is done. Lets create the application.

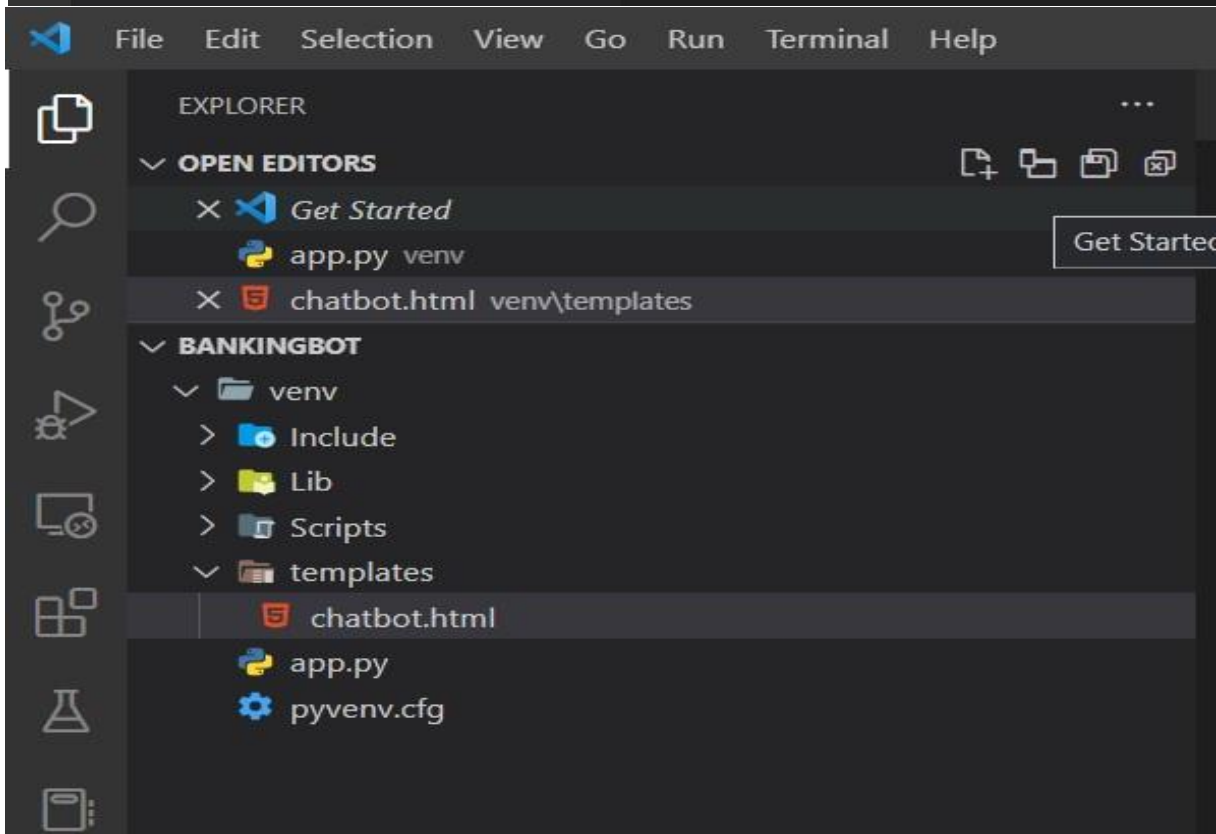

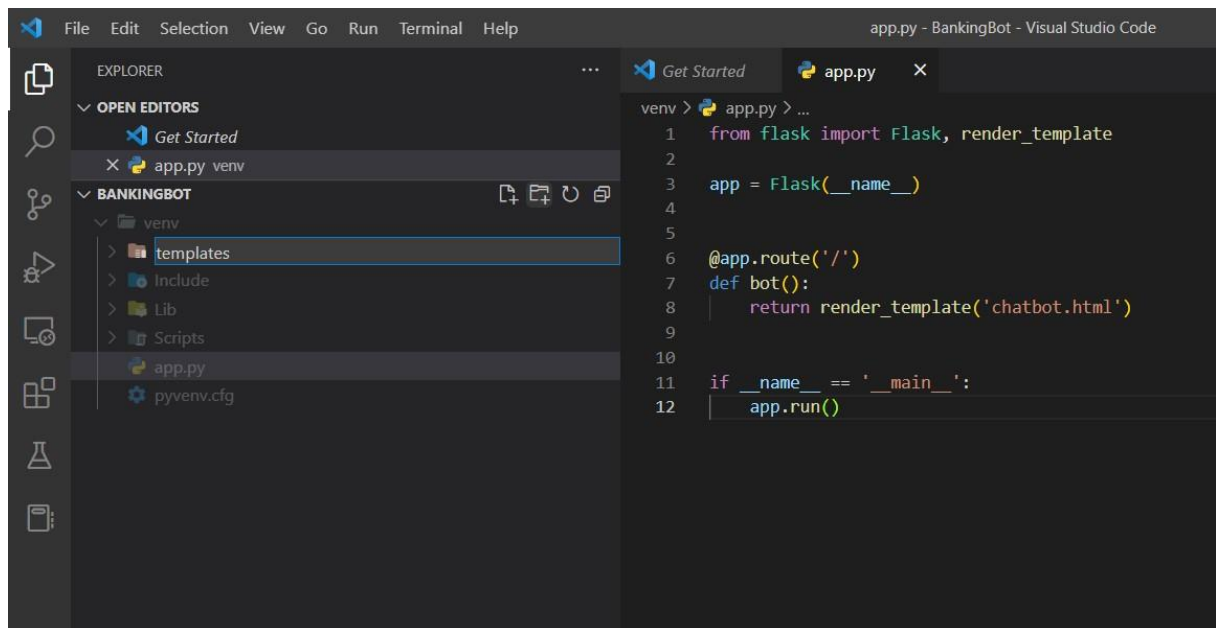

Create a file app.py inside venv folder

The code inside app.py is,

Then create a folder templates(spelling should be similar) and then create chatbot.html inside templates folder

Running the application

```
(venv) PS C:\Users\Sukirthi.S.J\Desktop\BankingBot> python -m flask run
* Debug mode: off
WARNING: This is a development server. Do not use it in a production deployment. Use a production WSGI server instead.
* Running on http://127.0.0.1:5000
Press CTRL+C to quit
```

If you copy paste the <http://127.0.0.1:5000> link on browser you will see a website
